Anne -

Here are the changes that need to happen on the WQMP. Do you know why the map information is not included? I thought we sent you all of our information.

Thank you,

Kristen

There are a couple of narrative revisions needed for us;

Pg 24 - add "Lancaster County Water & Sewer District" to Treatment Provider for our ILWWTF.

Pg 30 - They have this backwards. CWS treats the wastewater...not LCWSD.

I don't see where they have any of our map information. I see Ft. Mill, Town of Heath Springs, & Great Falls but not anything in Lancaster County.

To All:

Please find attached the 208 Water Quality Management Plan. I think Stephen wanted me to scan in and send to all of you so you all can confirm the maps. If you have any questions, please call or email at your earliest convenience.

Thank you,

Kristen
